Linear Screener Series MF

Screening and Separation

The ROLLIER Linear Screens Series MF.

This screener with up to 4 decks, available in longitudinal mesh tightening or transversally tightened mesh, with many different mesh options. The movement is driven by two vibratory motors.

The MF Inclined Linear Screener is particularly useful in screening:

- Fine & extra Fine Sand
- Crushed Glass
- Aggregates
- Pellets and Sawdust
- Sand Washing
- Quarries

Advantages of the linear screens MF series

- Robust and simple design
- Compacity
- Zero maintenance
- Easy mesh/screen replacement
- Low power consumption

The ROLLIER MF series linear screens are designed to offer improved screening capabilities for ultrafine and fine products.

The Linear movement is powered by two electric motor vibrators. These simple machines are capable of screening all types of bulk material, with a maximum of four screening stages and small to medium productions. They are ideal for use as control screening in industrial processes. The main feature of the **MF** series screens is their longitudinal mesh tightening system, meaning that the meshes can be changed very easily and quickly. This tightening system makes it possible to use very fine meshes with total reliability.

Many different models and screen mat arrangements are available.

Screening and Separation

MF Series Models

Model	Mesh Width (mm)	Mesh Length (mm)	Surface (m2)	Decks	Mesh Tightening
MF 50 130	500	1300	0,65	1, 2	Longitudinal
MF 75 130	750	1300	0,975	1, 2	Longitudinal
MF 100 200	1000	2000	2	1, 2	Longitudinal
MF 100 240	1000	2400	2,4	1, 2	Longitudinal
MF 150 200	1500	2000	3	1, 2	Longitudinal
MF 150 240	1500	2400	3,6	1, 2	Longitudinal
MF 150 280	1500	2800	4,2	1, 2	Longitudinal
MF 150 300	1500	3000	4,5	1, 2	Longitudinal
MF 150 400	1500	4000	6	1, 2	Longitudinal

Table of models available in the MFH series.

Model	Mesh Width (mm)	Mesh Length (mm)	Surface (m2)	Decks	Mesh Tightening
MFH 150 240	1500	2400	3,6	1, 2, 3	Transversal
MFH 150 280	1500	2800	4,2	1, 2, 3	Transversal
MFH 150 300	1500	3000	4,5	1, 2, 3	Transversal
MFH 150 350	1500	3500	5,25	1, 2, 3	Transversal
MFH 150 400	1500	4000	6	1, 2, 3	Transversal
MFH 150 450	1500	4500	6,75	1, 2, 3	Transversal
